

School of Education & University Libraries

## Master of Library & Information Science

The Master of Library and Information Science degree at UOG is a 36-credit-hour hybrid program that prepares graduates to serve in information organization settings, with a specific emphasis on developing a workforce for our region's school libraries, public libraries, academic libraries, and specialized collections.

### Benefits of the Program

- An MLIS degree offers diverse career opportunities in various sectors, including libraries and information management, with a unique emphasis on the cultural contexts of Guam and Micronesia.
- The program equips students with essential information management skills necessary for organizing and retrieving data effectively while also addressing local frameworks relevant to the Pacific Islands.
- Pursuing an MLIS fosters a lifelong learning mindset, encouraging critical thinking and research capabilities that are particularly valuable in understanding indigenous knowledge systems.
- Graduates gain proficiency in technology, including digital library systems, while being prepared to apply these skills within local and regional communities.
- An MLIS equips individuals to engage with and positively impact their communities through literacy programs and educational initiatives that reflect the unique cultural heritage of Guam and Micronesia.
